

Feast of red radicchio Dosson

In the fall of '86, at a meeting of friends, the conversation turned on events variously liven up a bit' the life of our country. It seemed that among the numerous initiatives of sporting, leisure and culture should not miss what should enhance the most typical product of our land: the red radicchio from Treviso, this prized vegetable that over centuries had its cradle right here at Dosson , where our farmers grow it always with care and art.

Thus was born the idea of organizing a street festival to promote more and better radicchio dossonese, emphasizing the age-old tradition, the idea is the unanimous consensus of those present at that meeting friendly.
